Die Umweltkennzeichnung von Verpackungen und Produkten basiert auf einem Gesetzesdekret Italiens und hat es zum Ziel den Verbraucher zur ordnungsgemäßen Entsorgung der Verpackung aufzuklären. Die zusätzliche Aufklärung nutzen wir in Form eines Labels für unsere Produkte. Die entsprechende Kennzeichnung veröffentlichen wir in unserem Ingredients-Booklet zu jedem Produkt. Das Label identifiziert die trennbaren Komponenten der Verpackung und zeigt den entsprechenden Entsorgungsweg über die Materialfamilie an. Der entsprechende Entsorgungsweg wird durch die farbliche Zuordnung zu den bekannten Farben Gelb (plastic/Plastik) , Blau (paper/Papier) und Grau (waste/Restmüll) leichter identifizierbar.

The eco-labelling of packaging and products to inform the consumer about the proper disposal of packaging is based on an Italian decree-law.

We provide this information for our products using a label.

The appropriate labelling can be found in our Ingredients-Booklet for each product.

The label identifies the separable components of the packaging and indicates the appropriate disposal channel through the indication of the material family.

The proper disposal channel is even easier to identify thanks to coloured marking; yellow for plastic, blue for paper and grey for waste.

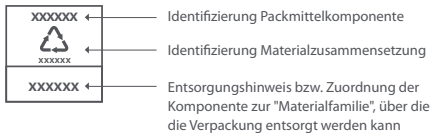

Le label écologique d'emballage et des produits repose sur un décret italien. Ce décret fixe l'objectif de sensibiliser les consommateurs concernant l'élimination correcte des déchets d'emballage.

Cette information supplémentaire est indiquée sur nos produits par un label.

Vous trouvez la signalisation appropriée pour chaque produit dans notre livre de ingrédients

Le label identifie les matières séparables d'emballage et indique la voie d'élimination conforme selon la famille du matériel d'emballage.

La voie d'élimination de déchets correcte est plus facilement identifiable par une classification de couleurs classique, jaune (Plastic/Plastique), bleu (Paper/Papier), gris (waste/matières résiduelles).
